

# Upstream Knowledge Unit of Oil and Gas Knowledge Center

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
MMF8805	Mothballing Oil & Gas Production Facilities for Medium Term Production Stoppages	Under Revision. Please see <a href="http://www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf">www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf</a> or email: <a href="mailto:regn@eurotraining.com">regn@eurotraining.com</a>
PCM6315	Corrosion Monitoring and Inspection in Upstream Facilities	Under Revision. Please see <a href="http://www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf">www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf</a> or email: <a href="mailto:regn@eurotraining.com">regn@eurotraining.com</a>
PDF7005	Onshore Upstream Production Technologies and Operational Processes	This program provides the participant a multi-discipline understanding of the Onshore Drilling Industry, Drilling Technologies, Drilling Work Methods, Safety Issues, Planning and Management., You will learn about the Good and Best Practices in the Onshore Upstream - Technical, Operational & Management Aspects. , Issues & Usual Problems , The Onshore Technologies , Onshore Industry Standards , Onshore Production Processes, Onshore Methodologies and Procedures , Quality Assurance in Onshore Processes , Planning Onshore Operations , Onshore Safety & Environmental Management, Onshore Operational KPIs, Program Recommendations
PDF7015	Offshore Upstream Production Technologies and Operational Processes	This unique program provides the participant a multi-discipline understanding of the Offshore Drilling Industry, Drilling Technologies, Drilling Work Methods, Safety Issues, Planning and Management. Program will cover Technical, Operational & Management Aspects and provide you a Multi-Discipline Understanding of your Operations, You will learn about the Worldwide Good and Best Practices in the Area. Technologies and Work Procedures for Offshore Production Facility Professionals, Administrators and Managers, Industry Terminology , The Offshore Technologies , Offshore Industry Standards , Offshore Processes, Offshore Methodologies and Procedures , Quality Assurance in Offshore Processes , Planning Offshore Operations , Offshore Safety & Environmental Management, Offshore Operational KPIs, Program Recommendations

# Upstream Knowledge Unit of Oil and Gas Knowledge Center

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
PED4625	Coordinating and Managing Field Development Study Processes	Under Revision. Please see <a href="http://www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf">www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf</a> or email: <a href="mailto:regn@eurotraining.com">regn@eurotraining.com</a>
PFA6405	Managing Failure Analysis of Petroleum Production Equipment & Systems	Under Revision. Please see <a href="http://www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf">www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf</a> or email: <a href="mailto:regn@eurotraining.com">regn@eurotraining.com</a>
POU7005	Upstream Oil-n-Gas-Technology Methods Management	This program will help you become a professional in the Oil & Gas Upstream Industry. This program is intended for all types of professionals working in Upstream Oil & Gas Industry. , You must be a graduate in any discipline to attend this program. If English is not your Native Language or You Feel You Need Oil & Gas Field Technical English Proficiency please attend the additional English Language Module (4 weeks)., Oil & Gas Upstream Technologies, Good & Best Upstream Management Practices, Practical Methods and Management of Upstream Facilities, Real world Upstream Management Case Studies, Upstream Vocabulary and English for non-native English speakers, Upstream Facilities Strategic Planning and Implementation
PSF4405	Surface Facilities Supervising and Management	Under Revision. Please see <a href="http://www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf">www.eurotraining.com/plist/psumm/upstream-training-summ-1w.pdf</a> or email: <a href="mailto:regn@eurotraining.com">regn@eurotraining.com</a>
PTF1305	Induction Training of New Operation Staff on Oil Rigs	This program will provide the participant complete understanding of Induction Training of New Staff on Rigs Processes and their Efficient Management. Program is intended for Supervisors and Managers with responsibility for Coordinating, Administering or Managing Exploration Activities. It is also beneficial for professionals looking to gain multidiscipline understanding of the functions and processes to enable better decision making. The Issues, Vocabulary, Technologies, Methods, Processes, Planning, Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators;

**Euro Training Limited**, 3422 Old Capitol Trail #1116, Wilmington, DE 19808, USA

# Upstream Knowledge Unit of Oil and Gas Knowledge Center

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
		Trending; Benchmarking; Balanced Score Card; Early Warning System: Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations & Action Plan: Workshops, Setting up Early warning system to Provide Decision Support Data.
PTN8825	Upstream Project Construction Technology & Work Methods	Those new to the field take away a good multi-discipline understanding of the issues involved in their work. It helps them in becoming productive quickly and in building a knowledge framework that will help them identify, understand, classify and remember on the job learning and experiences., Implementation Teams: This program can be used to train implementation teams? when a new project or initiative is being started in your organization; when a new strategic focus is being initiated; just prior to a consultant being hired to advise the organization, Problems on Oil & Gas Pipelines, Oil & Gas Pipeline Technology, Oil & Gas Pipeline Methods& Processes, Oil & Gas Pipeline Standards, Oil & Gas Pipeline Project Formulation& Feasibility, Oil & Gas Pipeline Planning, Oil & Gas Pipeline Pre-Construction & Mobilization Issues, Oil & Gas Pipeline Construction Planning & Management, Oil & Gas Pipeline Testing, Oil & Gas Pipeline Commissioning, Maintenance of Oil & Gas Pipelines, Program Recommendations
PTN8855	New Technologies, Good Practices & Best Practices in Oil & Gas Upstream Operations	This program is designed for Managers & Professionals Working in the Oil & Gas Industry: Senior Executives, Managers, Engineers, Planners, Estimators, Coordinators, Legal, Auditors, Cost Accountants and other professionals working on Upstream Oil & Gas Production Projects , Implementation Teams: This program can be used to train implementation teams? when a new project or initiative is being started in your organization; when a new strategic focus is being initiated; just prior to a consultant being hired to advise the organization, Understanding Operational Processes on Upstream Facilities, Understanding the Production Aspects, Understanding the Environmental Aspects, New Technologies in Upstream Facilities, Good Management Practices As Applied to Upstream Facilities, Some Best Practices for Upstream Facilities, Exploration Management, Drilling Management, Wellhead Production Management, Surface Facilities Management, Pipeline Operation & Management, Shipping Coordination, Program Recommendations

**Euro Training Limited**, 3422 Old Capitol Trail #1116, Wilmington, DE 19808, USA

# Upstream Knowledge Unit of Oil and Gas Knowledge Center

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
PTN8935	Upstream Oil & Gas Construction Technology	The program provides the Non-Petroleum Professional a good understanding of the Upstream Oil & Gas Technologies and Construction Methods so he can do his job effectively, This Program Serves to Refresh Knowledge and Learn New Technologies and Also Learn to Coach Others in this Area of Knowledge., Understanding nature of Crude Oil & Gas, Exploration Technology & Management, Drilling Technology, Well Drilling & Completion & Management, Environmental Technology & Management, Project Feasibility Aspects, Field Planning, Oil & Gas Project Mobilization, Constructing Surface Facilities on Oil & Gas Project, Oil & Gas Well Drilling, Oil & Gas Well Completion, Oil & Gas Well Production, Oil & Gas Pipelines & Transportation, Storage Facilities ? Tank Farms, Upstream Environmental Facilities, Program Recommendations
PTU1205	Roughneck Training	This program will provide the participant Comprehensive Understanding of Skills and Competencies required from Roughnecks and their efficient Development and Management., This Program Covers the Multidiscipline aspects of Efficient Management and Development of Roughnecks, The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU1225	Advanced Roughneck Training	This program will provide the participant competencies required from Roughnecks in order to assure superior performance and leadership in their work., This Program Takes a Multidiscipline Approach so that the Participant can discharge their job responsibilities effectively and efficiently, The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
		Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU3105	Managing Petroleum Exploration Projects	This program will provide the participant complete understanding of Petroleum Exploration Processes and their Efficient Management. The Program covers Coordination, Administration and Management Exploration Activities., It provides a multidiscipline understanding of the exploration functions to enable better decision making. Case Studies will include: Resoles Kaleidoscope System and BP's Supercomputer Based Systems., The Exploration Issues, Exploration Vocabulary, Exploration Technologies: Onshore; Offshore; Deep-Offshore; Under Salt Formations, Exploration Methods, Exploration Processes, Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System of Management; Good Management Practices Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending Benchmarking; Balanced Score Card, Exploration Contracts & their Administration, Exploration Data Acquisition Contracts and Important Contract Conditions, Processes to Create Leadership in Planning, Operation and Management, Case Studies:, Resoles Kaleidoscope, BP Super Computer System, Program Recommendations
PTU4105	Exploratory Well Planning & Implementation	This program provides participants in the understanding and planning of processes that precede actual drilling operations in a prospect. Program will also assist in understanding the associated risks and how to manage and report these risks., This program covers Petroleum Exploratory/Wild Cat Well Drilling- Planning, Coordination, Accounting, Auditing, Cost Control or Management., The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System;, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations

Petroleum Exploration Technologies, Petroleum Production Technologies, Unconventional Gas, Field Processing, Enhanced Oil Recovery Technologies, Environmental Aspects, Safety Aspects, Regulatory Aspects, Production Sharing

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
PTU4125	Developmental Well Planning & Management	This program provides participants in the understanding and planning of activities that precede actual drilling operations in a proven oil field., Participant will understand related issues of scope, deliverables, tasks, resources, costs, progress monitoring, cost control and early warning system for problems., The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU4265	Maintaining Sustainable Well Production	This program will provide the participant complete technology and methods on Techniques for Petroleum Well Servicing and Work-over and their Efficient Management., This program is intended for all professionals involved in Efforts to Keep Wells Producing including technical, operational, planning, coordination, accounting, auditing, cost control or management., The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management, Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Program Recommendations
PTU4885	Well Production and Control Planning & Management	This program will provide the participant Understanding of Processes, technology and methods of Well Control from Issues to Kick Monitoring to control procedures and methods to Equipment, and, Well Planning & Management., This program provides a unique multidiscipline (Technical-Legal-Management-Audit-Finance) analytical approach enabling you to take effective decisions, The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
		Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU4925	Enhanced Recovery Techniques Technology, Processes and Management	This program will provide the participant Understanding of Processes, technology and methods of Enhanced Recovery Techniques and their Efficient Planning, Implementation & Management., This program provides a unique multidiscipline (Technical-Legal-Management-Audit-Finance) analytical approach enabling you to take effective decisions, The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU4935	Steam & Water Flooding Enhanced Oil Recovery Technology, Processes and Management	This program provides a detailed understanding of Water & Steam Injection EOR Techniques and their combinations. The program will also provide an overview of All other EOR techniques., After the program the participant will become familiar with the Technology, Methods & Management of Water & Steam Injection Enhanced Oil Recovery Techniques. Participant will also get an understanding on the study routes to follow to become technology expertise in these fields., Enhanced Oil Recovery Techniques, Water Flooding Technology , Hot Water Flooding Technology, Steam Flooding, Steam Injection, Steam Drive Technology, Wellbore Cleanup Effect, Cyclic Steam Injection Method (Huff & Puff), Steam Flooding Method, Steam Assisted Gravity Draining Method (SAGD), Solvent Cyclic Steam-Assisted Gravity Drainage Method (SC-SAGD), Cyclic Steam Stimulation (CSS), Other Modified Water & Steam Enhanced Methods, Injection Wells, Well Patterns, Down Dip & Up Dip Effects , Sweep Efficiency, Chemicals to Increase Sweep Efficiency, Tracking Water & Steam Injections, 4D Surveys, Surface Equipment Water Injection, Surface Equipment Steam Injection, Program Recommendations

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
		Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations
PTU5145	Ensuring Safety during Oil & Gas Production	This program provides participants understanding and planning for safety during well production operations. Participant will understand related issues of identifying safety processes, risks and risk mitigation and Management., The program will also help setup an early warning system for safety related problems., The Issues, Vocabulary, Technologies, Methods, Processes, Planning , Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations.
PTU5205	Production & Field Separators Technology, Processes and Management	This program will provide the participant Understanding of Processes, technology and methods of Oil-Gas-Water Separators both Production and at Field Processing Facilities and their Efficient Planning, Implementation, Maintenance & Management. The Issues, Vocabulary, Technologies, Methods, Processes, Planning, Risk Identification, Risk Analysis, Risk Evaluation, Risk Treatment, Managing the Operations: Quality Assured System; Good Management Practices; Best Practices; Safety; Risk Management, Performance Management: Key Performance Indicators; Trending; Benchmarking; Balanced Score Card; Early Warning System, Outsourcing Contracts & their Administration, Processes to Create Leadership in Planning, Operation and Management, Industry Case Studies, Program Recommendations

## 5 Days (1 Week) Training Programs List

Program Code	Program Name (Click to Access Website Brochure with Current Dates)	Program Content Summary
XRM9705	Managing Operational Risks on Oil & Gas Surface Facilities	<p>This program provides the participant a range of practical skills to analyze and understand oil facilities risk management needs. It also helps devise strategies for the fulfillment of knowledge and skill requirements of the participant's Department/Organization. Participant will take away a detailed understanding of the step-by-step methodology for preparing a corporate/departmental strategic oil facilities risk management plan., Understanding oil facilities risk management, Oil facilities risk management vocabulary, Understanding the oil facilities business environment and context, Comprehensive identification of known, emerging and hidden oil facilities risks, Determining oil facilities risk appetite, Analyzing the oil facilities risks, Evaluating the oil facilities risks, Preparing oil facilities risk treatment recommendations, Approved oil facilities risk treatment plans, Analyzing the residual risks after treatment plan, Preparing an oil facilities risk control plan, Controlling the oil facilities risks, Management reporting of oil facilities risk status, Coordinating with &amp; consulting stakeholders, Getting management commitment for oil facilities risk management, Setting up and using an oil facilities risk management team, Setting up a good management system framework of oil facilities risk management, Setting up an oil facilities risk management knowledgebase, Personalized oil facilities risk management assignment/workshop, Program Recommendations</p>
